### Other Relevant Info

There has been clear indications that contact tracing is NOT being engaged in the ways it had been last year. Several individuals have indicated that their respective health authorities have NOT been in contact for contact tracing information even with a positive case.

"We have been notified that one of Bonaventure's employees working at the Baron's Place program has tested positive for COVID-19. The worker who was experiencing COVID-19 symptoms immediately reported to their manager, self-isolated, contacted VIHA for guidance, made a COVID-19 test appointment and received a positive COVID-19 test result. Bonaventure's management team has responded quickly and is diligently following our COVID-19 Pandemic Plan to reduce the risk of further transmission in the workplace."

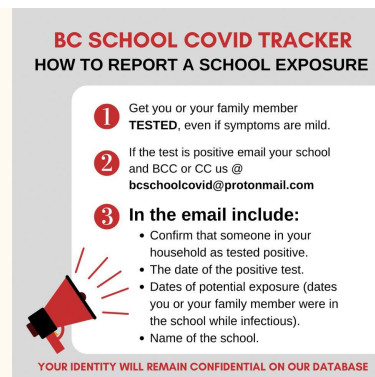

Despite the above notification going to workers, families/individuals that were in direct contact during this time were NOT contact by the health authorities for contact tracing. We continue to thank all citizens that are reporting their cases so that we all can be safer.

## Positivity Rate (7-day moving average)

### BCCDC Data - September 9, 2021

Fraser Health: 4.7%  
Interior Health: 11.7%  
Northern Health: 22.5%  
Vancouver Coastal Health: 3.7%  
Vancouver Island Health: 6.5%  
British Columbia: 6.4%

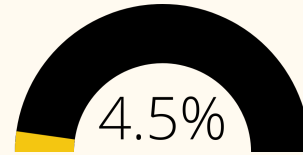

"Note: % positivity increased as the testing strategy focused on high risk populations and decreased with the implementation of universal testing."

The BCCDC dashboard now includes the following quote. Access to testing has continued to be restricted and these numbers are likely under-estimated.
